POINTS STORE

Built on our modern Bright Sites Company Store Platform, a Points Store allows users to purchase products through a points based program rather than a currency system, perfect for various reward and employee programs.

Getting started is easy:

1 **Determine Point Conversion Rate**

The point conversion rate is set by the store administrator, this is the number of points that equate to a dollar for the store.

For example, a conversion of 50 means that a $10 item will cost 500 points.

2 **Set Up Your Points Store**

A Point Store is similar to our Bright Sites currency stores but is even easier to configure and administer. Based on the conversion rate determined, all products are shown in point value rather than dollar value.

3 **Start Shopping!**

Assign points to each store user, save time by uploading users and points into the system. Users can then start shoppping immediately with their assigned points! If they don't have enough points to cover the purchase, they can make up the balance out of their own pocket.

Is a Bright Sites Points Store the Right Solution for You?

- 🛒 Reward, Incentive and Loyalty Programs
- 🛒 Employee Recognition and Safety Programs
- 🛒 Points Based Program Only
